

Get Ready for... Virtual Catch the Wave Series!

TSLP will be providing the 2021 Virtual Catch the Wave series. Once a week for 5 weeks a video clip will be sent out with important information on post-secondary education for high school students with disabilities. We encourage you to use the videos with your students. The videos will be available on the [TSLP Website](#) and sent out via the [DOE Special Education Transition Mailing Listserv](#). This DOE link is where you will be able to sign up for the transition mailing listserv, if you have not already done so. Check out our [Catch the Wave Manual](#) to use in conjunction with the videos or to share with parents. The videos and manual contain all the most pertinent information students and families need to know before going to college or any post-secondary experience. Dates and video topics are listed below.

March 3: Key Differences Between High School and College

March 10: Disability Coordinator Services and Supports

March 17: Vocational Rehabilitation Services for College-Bound Students

March 24: Financial Aid

March 31: Assistive Technology Resources

If you have any questions about the CTW series, contact your regional transition liaison.
