## Science Progressions

## Definitions:

- Physics is the study of matter and its motion and behavior through space and time, along with related concepts such as energy and force.
- Chemistry is the study of matter and the chemical reactions between substances. Chemistry is also the study of matter's composition, structure, and properties. Matter is essentially anything in the world that takes up space and has mass.
- Anatomy is the study of body parts such as the bones, muscles, tissues, and organs. Physiology is the study of the function of body parts and the body as a whole.
- AP = Advanced Placement = College Level (Year-End test to earn college credits)
